

Budget Pro — Complete User Manual (English)

App version: 2.1.9+ Author: Saleem Shalwani

This guide is for everyone — even if you never used a money app before.

Welcome

Budget Pro is your personal money + family life binder:

- Track income, expense, transfers
- Convert foreign currency (USD, AED, ...) into your home currency (e.g. PKR)
- Keep investments (shares, gold in tola, crypto...)
- Write a Journal (Diary + Notes)
- Store Vault passwords, cards, and family documents (CNIC, passport...)
- Use multiple profiles (Personal, Shop, Pharmacy...)

Important: The app does not connect to your bank. It only records what you type. You stay in control.

Part 1 — Install

Android

- 1. Copy app-release.apk to your phone.
- 2. Open it allow Install unknown apps if asked Install.
- 3. Open Budget Pro.

Windows

- 1. Run budget_pro.exe from the Release folder.
- 2. If Windows warns you, choose More info Run anyway (only if you trust the file).

Part 2 — Bottom tabs (6 tabs)

Tab | Purpose

Wallet | Daily money, balances, add transactions

Reports | Charts, statements, PDF/Excel/Urdu share

Portfolio | Investments (shares, gold tola, crypto...)

Journal | Diary + Notes in one place (two sub-tabs)

Vault | Passwords, cards, family documents + expiry alerts

Settings | Currency, security, backup, accounts, categories

Part 3 — Top bar

Control | What it does

Switch profile | Personal / Shop / Pharmacy... (each has its own data)

Bell | Budget alerts or Family expiry center

+ / Search | Add transaction / search (on Wallet)

Power | Exit app

Part 4 — Wallet

What you see

- Total balance = opening balances + income - expense
- Account chips under the total = live balance per account (Cash, Bank...)
- Income / Expense totals for the filtered list
- Calendar to filter by day
- Transaction list with receipts

Add a transaction

- 1. Tap + or Add.
- 2. Choose Expense / Income / Transfer.
- 3. Enter Title, optional description.
- 4. Currency — defaults to your home currency (Settings).

- Change to USD / AED / ... if you spent foreign money. - Type amount in that currency (e.g. 5). - App shows Final amount (PKR) using today's rate (or manual rate offline).

- 5. Optional Family member — tag spending to someone from Vault family docs.
- 6. Pick account, category, receipts Save.

Transfers

- Money moves from Account To Account (must be different).
- Budget chips: (default = no budget effect), + or - if you want the transfer to affect a category budget.

Tips

- Numbers are stored in your home currency.
- Changing home currency later only changes the label, not old amounts.
- Renaming an account updates old transactions automatically.

Part 5 — Default currency & FX

- 1. Settings Default currency (e.g. Pakistani Rupee).
- 2. This is your home currency for wallet totals and conversion.
- 3. In New Transaction, pick another currency to convert at today's rate.
- 4. If the internet fails, use Use manual rate.

Part 6 — Profiles

- 1. Tap Switch profile (top).
- 2. Tap a profile to switch, or create a new one.
- 3. Choose a starter template:

- Personal — default cash & categories - Shop — JazzCash, EasyPaisa, Bank, sales categories - Pharmacy — counter + medicine categories - Empty — blank start

- 4. Each profile has its own database, password, vault PIN, and currency.

Part 7 — Reports

- Filter by account, category, date range.
- See opening / closing balances and charts.
- Export PDF / Excel or share in Urdu.

Part 8 — Portfolio

- 1. Add holdings: Stocks, Mutual Funds, Gold, Crypto, Bonds, Property...
- 2. For Gold: quantity is in tola; enter buy/current per tola rate.
- 3. Update current price anytime for P/L.
- 4. Portfolio is separate from Wallet cash (manual tracker).

Part 9 — Journal (Diary + Notes)

One tab with two sub-tabs:

Sub-tab | Use for

Diary | Daily journal, voice EN/UR, photos, share

Notes | Colored notes, links, reminders fields

Reminders are saved in the note/entry for your own tracking.

Part 10 — Vault

Protected by a separate Vault PIN (local on this device — not cloud “E2E encryption”).

Sections:

- Passwords
- Cards (incl. PayPak and local types)
- Family Documents — CNIC, passport, medical, education... with expiry dates

Family expiry center

- Tap the bell in Vault (or app bar Family expiry).
- Shows docs/cards expired or due within 30 days.

Share photos from WhatsApp/Gallery into Family Documents when the app asks.

Part 11 — Backup & Restore (Settings)

Clear groups:

All profiles

Action | Meaning

Backup all profiles | Full file + pictures WhatsApp / Files

Restore all profiles | Replaces every profile on this device

Google Drive Sync / Restore | Same full backup in the cloud (optional)

This profile only

Action | Meaning

Export this profile | Backup only the active profile

Import into this profile | Restore into active profile only

Restore file into this profile | Pick single-profile .budgetpro (or old SQLite)

Restore as new profile | Creates a new profile from a single backup

Tip: Full backup file single-profile file. The app will tell you if you pick the wrong type.

Part 12 — Security

- App password + optional biometric
- Idle lock after ~3 minutes
- Vault PIN for Vault only
- Reset options in Settings clear the active profile data (confirm carefully)

Part 13 — Quick daily routine

- 1. Open Wallet add today's expenses/income.
- 2. Foreign salary/spend? Change Currency on the transaction.
- 3. Check bell for budgets & document expiry.
- 4. Once a week: Backup all profiles to WhatsApp or Drive.
- 5. Shop/pharmacy? Use a separate profile with the right template.

Need help?

- Google Drive setup: docs/GOOGLE_DRIVE_SETUP.md
- Rebuild guides (DOCX/PDF): python scripts/generate_user_guides.py

Made with care for Pakistan & diaspora families — money, documents, and peace of mind in one app.
